Data Warehousing

Samreen Mohammed

data analyst trainee at Bajaj Finserv
Alpharetta, Georgia, United States

Summary

Computer Science master’s graduate with foundational analytics skills and hands-on familiarity with Excel, Power BI, Tableau, Salesforce, Power Query, SQL, Python, and databases.Interested in Data Analyst, Business Intelligence Analyst, and Business Analyst opportunities. Able to support data preparation, reporting, dashboard development, and business-focused analysis.Open to relocation and remote, hybrid, or on-site opportunities.

Experience

Cigna Healthcare

Data Analyst
January 2025 - February 2026 (1 year 2 months)
remote

* Build and maintain claims-based data extracts and healthcare claims analytics pipelines in Snowflake and AWS environments, processing over 8M + healthcare claim records annually to support operational reporting, utilization metrics, and KPI monitoring.
* Write and optimize complex SQL queries across large healthcare datasets in Snowflake and Athena, including joins, window functions, performance tuning, pipeline automation, and quarterly data refreshes.
* Develop performance measures and cohort analysis models using SQL and Python to identify utilization trends, claims-based patterns, and operational metrics.
* Investigate data quality issues and metric discrepancies and document methodology, data sources, and assumptions to produce auditable and repeatable reporting.
* Prepare curated datasets for Power BI and other downstream BI reporting and collaborate with analytics, product, and operations teams.
* Automate recurring reporting and reconciliation workflows using SQL, Python, and dbt, reducing manual reporting preparation effort by approximately 35%.

* Apply anomaly detection using Python and Scikit-learn and collaborate with cross-functional teams using JIRA, Git, and Agile workflows.

Dr. Reddy's Laboratories
Junior Data Analyst
January 2022 - November 2023 (1 year 11 months)
Hyderabad, Telangana, India

* Built and maintained SQL-based data extracts and performance measures for manufacturing operations, inventory, and supply-chain reporting.
* Developed Tableau and Power BI dashboards for production and compliance stakeholders to monitor batch-processing efficiency, operational KPIs, and performance metrics.
* Translated business specifications and methodologies into analytical SQL logic and reusable validation queries, reducing recurring metric discrepancies by approximately 25%.
* Investigated data-quality issues and maintained auditable methodology, data-source, and reporting documentation.
* Built Python-based ETL utilities for data transformation and pipeline automation, reducing manual reporting effort by approximately 30%.
* Collaborated with operational stakeholders and IT teams and delivered analytical summaries using Power BI, Tableau, and Excel.

Bajaj Finserv
data analyst trainee
January 2021 - December 2021 (1 year)
Hyderabad, Telangana, India

* Performed SQL-based data extraction and analysis on customer, lending, and transactional datasets containing over 2M+ records to support repayment analytics, utilization metrics, and KPI reporting.
* Developed Tableau and Power BI dashboards tracking repayment behavior, delinquency trends, and lending performance benchmarks.
* Investigated data-quality issues and metric discrepancies and documented methodology, data sources, and assumptions.
* Translated business specifications into SQL analytical logic and reusable reporting frameworks.
* Built Python-based data transformation and automation scripts using Pandas and NumPy and assisted with Snowflake and Amazon Redshift data environments.
* Maintained reporting documentation, KPI definitions, and data-governance records while collaborating with analytics and operations teams.

Education

Auburn University at Montgomery

Master of Science, Computer Science · (January 2024 - May 2026)

Avanthi Institute of Engineering & Technology

Bachelor of Engineering, Computer Science · (August 2017 - June 2021)
